

How to install FELIXbuilder on a new system

# FELIX Pro 1

11 June 2016

Revision 2

# 1 Introduction

This guide will explain how FELIXbuilder can be installed onto a new computer. This manual requires you to use the voucher code for FELIXbuilder which you have received directly from us through email or from your local sales person.

## 1.1 Open the following page in your browser

Go to <https://passwords.materialise.com> and fill in your voucher code into the following box

The screenshot shows the 'Online Password Generation' page from Materialise. The page has a header with the Materialise logo on the left and two links on the right: 'Visit the Magics User Community' and 'Visit the Mimics Innovation Suite Community'. The main content area starts with a greeting 'Dear Materialise Software user,' followed by a welcome message. A section titled 'Licensed Software Solutions' contains instructions on how to generate passwords using a CCKey or voucher code. Below this is a form with a text input field (highlighted with a red border) and a 'Submit' button. At the bottom, there are two footnotes explaining the CCKey and voucher codes.

**Materialise**  
innovators you can count on

Visit the Mimics Innovation Suite Community

Dear Materialise Software user,

Welcome to our web passwords site. Below you can choose to visit the dedicated section for our *Licensed software solutions* or our *Free software*.

---

### Licensed Software Solutions

If you want to generate passwords for your Materialise software or update your software by downloading the latest version, you can do this by entering your CCKey<sup>(1)</sup> or voucher code<sup>(2)</sup> below. Your CCKey code can be found on the Certificate of Authenticity you received with your software.

Enter your CCKey/ voucher code:

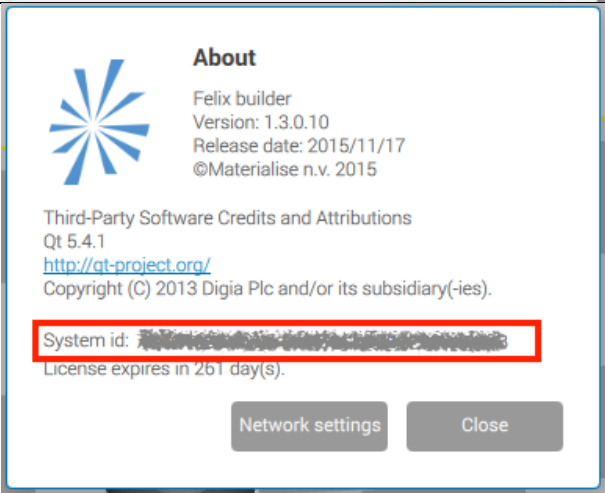

1) your CCKey is a unique 16-character-long code linked to your Materialise Software license. This code can be found on the Certificate of Authenticity sent with each licensed copy of Materialise software.

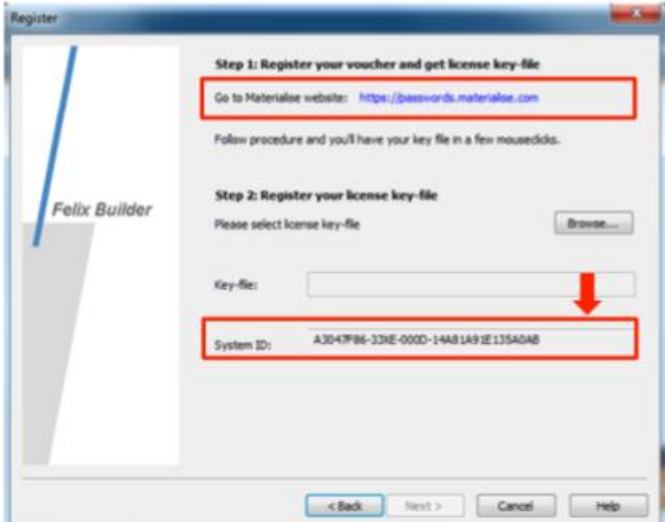

2) A voucher is also a unique 16-character-long code distributed by Materialise or one of our trusted partners. A voucher code allows you to generate a (temporary) license for a pre-determined Materialise licensed software.

## 1.2 Fill in the system ID of the computer on which you want to install FELIXBuilder

For both Windows and Mac there are different ways to find out what the system ID is.

Windows users can find the explanation of this step on the next page.

<p><b>Mac</b></p>	
<p>Open FELIXbuilder and click on the information symbol.</p>	
<p>A new screen will open. You can find your system ID in the bottom part of this screen.</p>	

<b>Windows</b>	
<p>Start the installation of FELIXBuilder. At some point it will ask you to register FELIXbuilder. In the same screen, you will find your system ID.</p>	

If you are unable to continue or have any questions, you can check at the support section of our website or you can contact us directly:
