# Update FELIXBuilder profiles

It is important to update the profiles of the FELIXbuilder before using it the first time.

We update the profiles frequently to add our knowledge of the printer and the materials we sell.
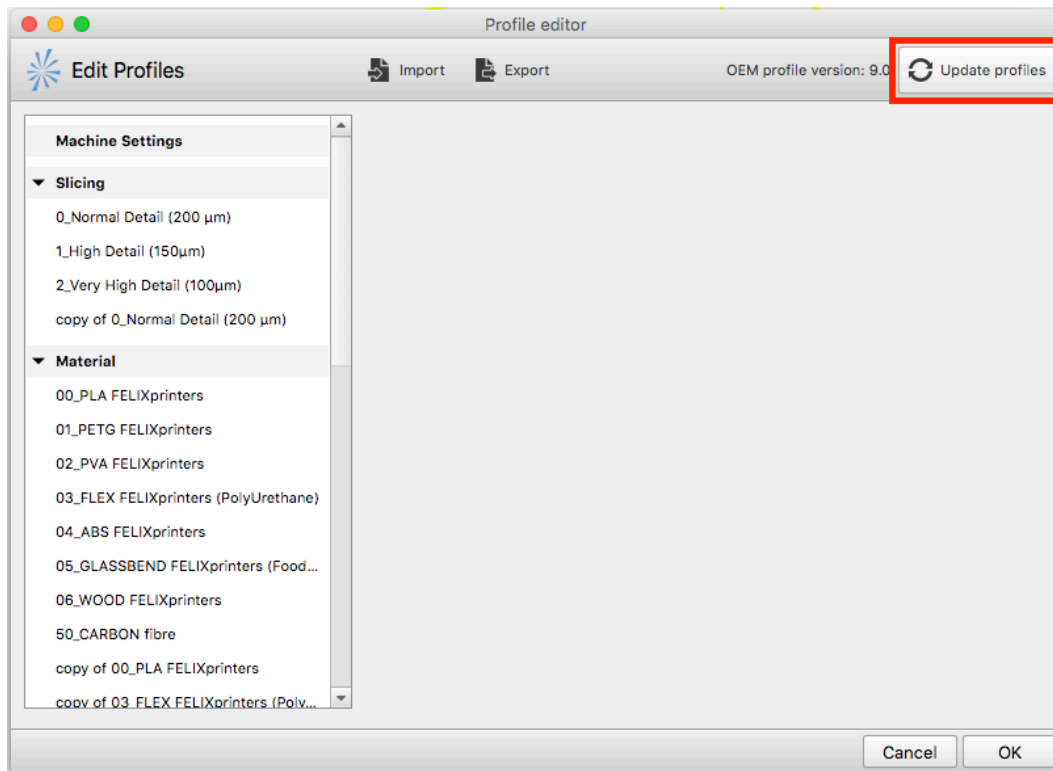

To update

Open FELIXbuilder > click on the Print button.

Click on the 'Settings' button. The Profile Editor will open.

v1

In the Profile Editor, click on Update Profiles in the right top corner.

To make sure the installation was succesful, click on the same button again. The following message should appear. You are now using the lastest profile settings.
